Secretary of State Expresses Strong Support for President Trump's White House Address

CHEYENNE, WY – In response to President Trump's White House Address to the Nation on July 16, 2026, Wyoming Secretary of State Chuck Gray made the following statement:

"I applaud President Trump's address. I want to thank President Trump and the entire Trump Administration for their efforts on ensuring election integrity, and for standing for the truth in the face of constant attack by the insider class and left-wing media elites. It is so important that we fight back against China and defeat China in our continued efforts to secure our elections. We must defeat China. Our continued work on voter list maintenance and election integrity is so important, and there is a reason that the leftwing media has attacked us every step of the way in these election integrity efforts. It is also extremely important that the U.S. Congress pass the SAVE America Act. The SAVE America Act is essential to ensuring common-sense election integrity measures designed to secure our elections. I am proud of our work here in Wyoming to defeat China, and pass President Trump's election integrity agenda, including proof of United States citizenship, Voter ID, hand examination of the ballot counts, and enhanced voter list maintenance procedures. We will continue to work to implement our election integrity agenda to ensure secure elections."
